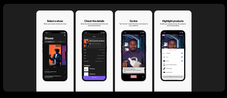
Bamboser Video Commerce

Shopping

Bamboser Video Commerce enables you to livestream directly to your customers, using your brand's voice and delivering exclusive deals. Customers can interact with the host, ask questions, see product details, purchase, like and comment in a fully interactive environment.

I was responsible for developing of new features and bug fixing.

Swift 2024, Bamboser



Bamboser PlayerSDK

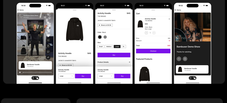
Live-streaming, live-commerce

BamboserPlayerSDK let's you add a Bamboser Live Video Shopping SVID Player to your app.

The LVS player can be used to watch live and recorded shows, with UI overlays that let's users interact with the show.

The LVS player can be configured to a great extent and also lets you listen for player emitted events and perform player-specific functions.

Swift/UI 2023, Bamboser



Boostie

Fitness

Boostie PRO Workout Interval Timer is a comprehensive app tailored for Tabata training and various interval workouts.

Simplifying exercise routines, it automates intervals for enhanced focus and efficiency. The app boasts a user-friendly interface, accommodating auditory cues and voice support, it ensures seamless workouts.

Features include personal exercise, flexible intervals, background operation, and alerts, making it user-friendly and versatile for any training method.

Swift/UI 2023, PA Project

Transcriber

Utilities

It's an iOS app that provides real-time speech-to-text transcription to make voice notes easily using only your iPhone.

Swift 2023, Client request

alto.daily

Utilities

alto.daily is a macOS application.

It's an application that was developed as a utility for native Reminders.

You can track your habits in a precise way:

- Create list in Apple Reminders
- Add tags to tasks like "work", "run", "read", "gym",
- Select list in alto.daily.

Done. Now you can see your habit streaks.

SwiftUI 2023, Client request

My Upcoming Events

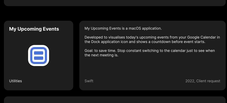
Utilities

My Upcoming Events is a macOS application.

Developed to visualize today's upcoming events from your Google Calendar in the Dock application icon and shows a countdown before event starts.

Goal is save time. Stop constant switching to the calendar just to see when the next meeting is.

Swift 2022, Client request



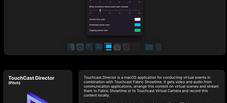
TouchCast Director

Video production, Streaming

TouchCast Director is a macOS application for conducting virtual events in combination with TouchCast Factory Showtime. It gets video and audio from videoconferencing applications, arranges the content on virtual stories and stream it to Facebook, Livestream or to TouchCast Virtual Camera and record the content locally.

I was responsible for developing of new features, Zoom SDK integration, and bug fixing.

Objective-C, Swift 2022, VMoxe



ComeBack Mobility - Patient

Healthcare, Medical

A mobile application that connects Smart Crutch via Bluetooth Low Energy.

An app provides a way to instant feedback when you exceed your doctor's prescribed weight-bearing MBS status. Communicates your rehabilitation concerns with your physician and monitor your daily activity level.

I was involved as a consultant. And was responsible for the Internal SDK of the BLE layer.

Swift 2021, ComeBack Mobility

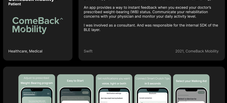
Level UP Ukraine

Education

A web and mobile platform for participating in business events, communicating, and being a part of a business community.

With this application people attending the conference could have all the information and media about it, view other participants and chat with them, etc.

Swift 2019, Powercode



My Pocket Therapist
